Examiner's Statement for Reasons of Allowance

1. The following is an examiner's statement of reasons for allowance:

The claims present a combination of elements which create a unique upstream messaging method, most notably the use of the user-user data field of the DSM-CC or ISA protocols to contain two distinct pieces of routing information in addition to a third routing address, all contained within the same session setup request. These features in combination with the claimed structure of gateways that route the session setup request presents a method and system for selecting services in a cable system that is not anticipated or obvious over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
